KSIS Points of Contact:

This is advanced notice that KDE is targeting the release of **Rx Pack E.1314.5** to all Kentucky Infinite Campus production and sandbox environments starting **Tuesday, May 21 at 8:00 p.m. (EDT) / 7:00 p.m. (CDT)**. You will experience some Campus down time during the update process. Please notify Campus users in your district accordingly. This Rx Pack is necessary to correct an urgent issue.

The patch will correct issue IEP Plan Batch Syncing Incorrectly Deleting Plans (SIS-66619). Batch syncing the Plan object was incorrectly causing plans outside the year being synced to be deleted. Syncing logic has been corrected to no longer delete records. *Path: System Administration > Data Utilities > Resync State Data*

We apologize for any inconvenience this service disruption may cause. If the scheduled time creates a conflict for your site, please contact me immediately and we will attempt to reschedule the update for your site.

Thank you,
